Ultimate Capacity up to 1100 US Tons

Completely Mobile Under Load

Easily Transportable by Conventional Trucks

Counterweights Assembled and Filled On-Site

Easily Adaptable to All Lift Situations

Call For Complete Capabilities

The Lampson Transi-Lift® LTL-1000 and 1100 are two models of the world's most versatile Heavy Lift System. The Transi-Lift® Mobile Crane is a patented crane configuration that combines the heavy lifting capacities of stiff leg derricks and ring mounted lift equipment with the mobility of a conventional crawler crane.

The models 1000 and 1100 are easily adaptable to the lift requirements of today's heavy construction industry. All Transi-Lift® models boast precise maneuverability, adjustable stinger length, and multiple boom/jib combinations. These attributes, along with ease of operation, mechanical reliability, and worldwide availability make the Transi-Lift® the best choice for your most demanding lifting projects.
